## Program Review Data

[Go to the Program Review Data Dashboard](#)

New for spring 2018, the program review data dashboard includes the same data that has been provided in the Excel spreadsheets in the past, but in a more compact and visual format. Features include:

- Comparison of program course success rates against Institution-Set Standard for Course Success

- Comparison of program degrees and certificates awarded against Institution-Set Standards for degrees and certificates

- Disaggregate course success and completion rates by:

- Age
- Campus Location
- Class Meeting Time
- Students' Economically Disadvantaged Status
- Ethnicity
- Gender
- Instructional Method

- Program productivity (WSCH/FTEF) and faculty workloads

- Course-level enrollment and success data, including disaggregation

Please note that the dashboard consists of four separate pages, which can be navigated using the arrows at the bottom of the screen. **Each time you move to a new page in the dashboard, you must reselect your college and program.**

The previously used Excel files for program review data can still be accessed on the [MyWestHills portal](#).
