Action, Information, Report: 3.2 ISLO 2018 Recommendations - Discussion regarding ISLO Report – A. Hanjiev stated that this would be the last time to look at share point drive/data. Req#1 – A. Hanjiev stated the reason for the first recommendation was the fact that faculty stated that when students are not meeting the success criteria for the SLOs, most of the time, it was because students were not turning in the work. During the discussions in the meeting it was suggested, since there was not enough data to make a conclusive decision, for faculty to meet on a FLEX Day activity to discuss on how to proceed. Req#2 – A. Hanjiev presented the fact that on some of the SLO results it was evident that faculty, for some reason, thought that new SLOs need to be made after a successful assessment of previous SLOs. The recommendation is that there should be some type of training for faculty on the permanence of SLOs. Req#3 - Need of basic training - possibly doing a YouTube video or canvas training video. R. Pimentel will have A. Hanjiev added to the training site of the Canvas shell so that we can possibly train full-time as well as part-time faculty on SLOs. Req#4 - this was a recommendation for the ILOC to meet more often. Req#5 - This was a recommendation to add more members such as two (2) per learning area. R. Pimentel suggested to not necessarily add them as voting members in order to qualify for a quorum for voting purposes.
