

## **Board Policy 207 Ad Hoc Committees**

It shall be the policy of the Board of Trustees to support a system in which professional staff members have participation in the governance of the District through the appointment of Ad Hoc Committees to work on specific programs or tasks.

From time to time temporary committees, e.g., General Education, Aims and Objectives, Grading Practices, etc., may be appointed to make recommendations on current questions. Ad Hoc Committees may be instituted by any segment of the college community. Such committees shall be held to a minimum and, whenever possible, questions shall be referred to the permanent committees.

The Board directs the Chancellor to develop procedures for the conduct, reporting and evaluation of the committee system. The Chancellor, in consultation with the Faculty Senate, shall appoint staff members to the various committees on an equitable basis, assuring both broad representation and equivalent work loads.
